Planning report

Introduction

The key messages in this report

Audit quality is our number one priority. We plan our audit to focus on audit quality and have set the following audit quality objectives for this audit:

- A robust challenge of the key judgements taken in the preparation of the annual report and financial statements.
- A strong understanding of your internal control environment.
- A well planned and delivered audit that raises findings early with those charged with governance.

I have pleasure in presenting our planning report to the Scottish Human Rights Commission ('the Commission') for the 2020/21 audit. I would like to draw your attention to the key messages of this paper:

Audit plan

We have updated our understanding of the Commission, including discussion with management and review of relevant documents. This has included consideration of the impact the COVID-19 pandemic has had on the Commission. Based on these procedures, we have developed this plan in collaboration with the Commission to ensure that we provide an effective audit service that meets your expectation and focuses on the most significant areas of importance and risk to the Commission.

Key risks

We have taken an initial view as to the significant audit risks the Commission faces. These are presented as a summary dashboard on page 11.

Audit dimensions

The Code of Audit Practice sets out four audit dimensions which set a common framework for all public sector audits in Scotland. In line with previous years, we have concluded that the full application of the wider scope is not appropriate and applied the “small body” clause set out in the Code which allows narrower scope work to be carried out. The rationale for this is discussed further on page 23.

In carrying out our annual risk assessment, we have considered the arrangements in place for each dimension, building on our findings and conclusions from previous years' audits as well as planning guidance published by Audit Scotland. Our significant risks are presented on page 23.

Introduction (continued)

The key messages in this report (continued)

Regulatory change

Our audit approach reflects changes to International Standards on Auditing (UK) on going concern (ISA (UK) 570) and management estimates (ISA (UK) 540), and Practice Note 10, effective for this year.

Our commitment to quality

We are committed to providing the highest quality audit, with input from our market leading specialists, sophisticated data analytics and our wealth of experience.

As part of our planning discussions with management, we have shared our *“Key Lessons from 2019/2020 Audits”* to help prepare for the 2020/21 audit, ensuring a focus on quality.

Added value

Our aim is to add value to the Commission through our external audit work by being constructive and forward looking, by identifying areas of improvement and by recommending and encouraging good practice. In this way, we aim to help the Commission promote improved standards of governance, better management and decision making and more effective use of resources.

We have also shared our recent research, informed perspectives and best practice from our work across the wider public sector on pages 26 to 31 of this paper.

Pat Kenny
Audit Director

Your control environment

What we consider when we plan the audit

We expect management and those charged with governance to recognise the importance of a strong control environment and take proactive steps to deal with deficiencies identified on a timely basis.

Responsibilities of management

Auditing standards require us to only accept or continue with an audit engagement when the preconditions for an audit are present. These preconditions include obtaining the agreement of management and those charged with governance that they acknowledge and understand their responsibilities for, amongst other things, internal control as is necessary to enable the preparation of annual report and financial statements that are free from material misstatement, whether due to fraud or error.

As stakeholders tell us that they wish to understand how external audit challenges and responds to the quality of an entity's control environment, we are seeking to enhance how we plan and report on the results of the audit in response. We will be placing increased focus on how the control environment impacts the audit, from our initial risk assessment, to our testing approach and how we report on misstatements and control deficiencies.

Responsibilities of the Commissioners

The Commissioners are responsible for:

- Reviewing the internal control and risk management systems.
- Explaining what actions have been, or are being taken to remedy any significant failings or weaknesses.

Reliance on controls

We will seek to undertake design and implementation testing on controls in respect of our identified significant risk areas. In accordance with forthcoming revisions to ISAs, we will assess inherent risk and control risk associated with accounting estimates.

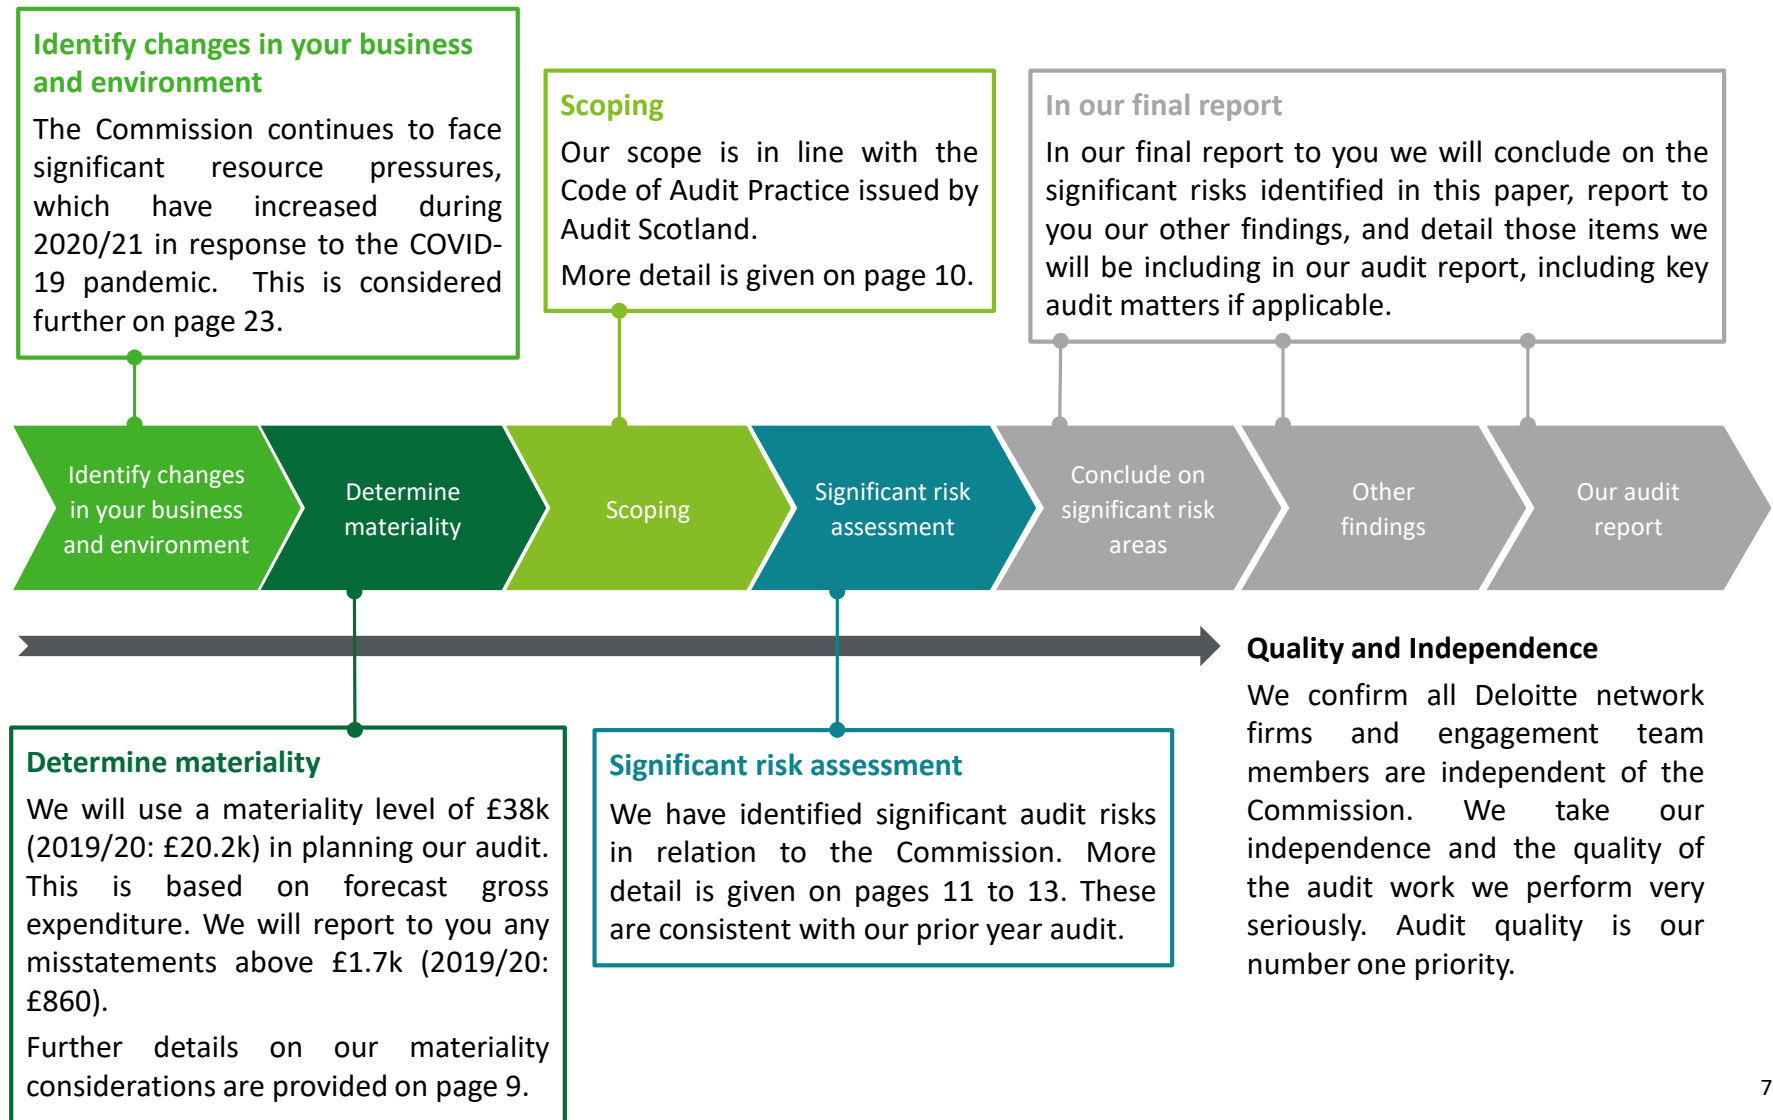

Performance materiality

We set performance materiality as a percentage of materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed materiality. We determine performance materiality, with reference to factors such as the quality of the control environment and the historical error rate. Where we are unable to rely on controls, we may use a lower level of performance materiality.

Our audit explained

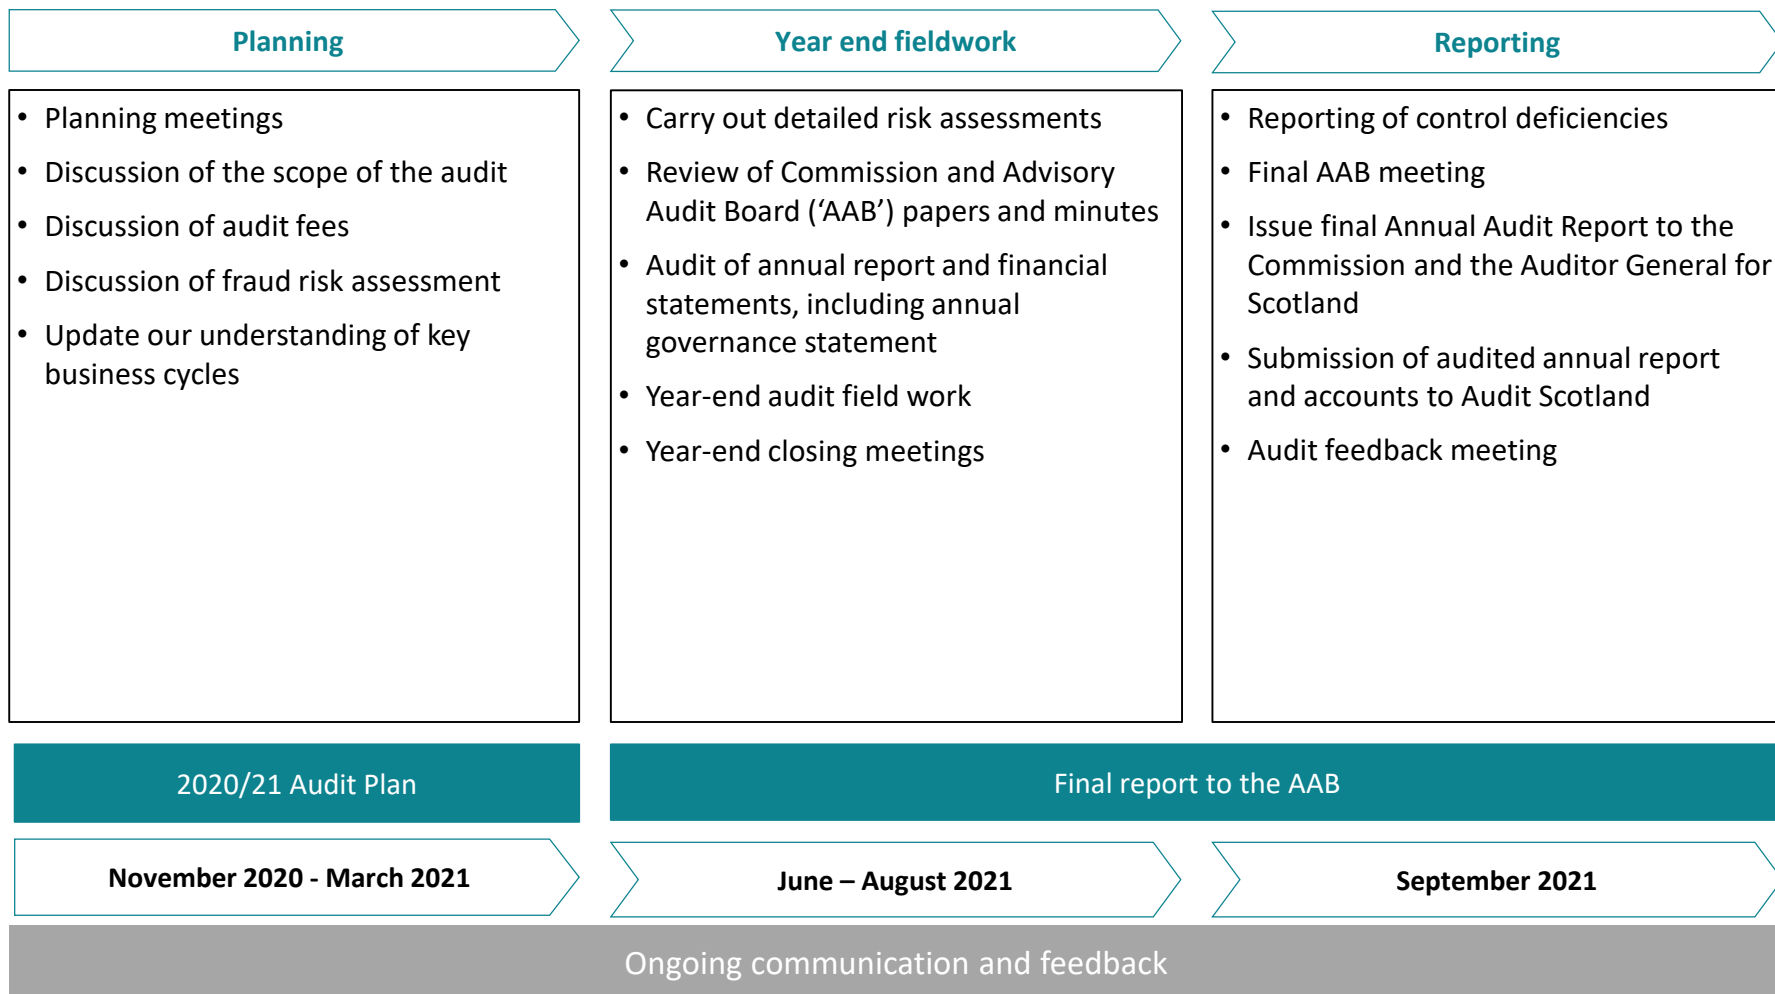

We tailor our audit to your business and your strategy

Continuous communication and reporting

Planned timing of the audit

As the audit plan is executed throughout the year, the results will be analysed continuously and conclusions (preliminary and otherwise) will be drawn. The following sets out the expected timing of our reporting to and communication with you.

Materiality

Our approach to materiality

Basis of our materiality benchmark

- The Audit Director has determined materiality as £38k (2019/20: £20.2k) and performance materiality as £26k (2019/20: £15.15k), based on professional judgement, the requirements of auditing standards and the financial measures most relevant to users of the annual report and financial statements.
- We have used 3.5% of forecast gross expenditure as the benchmark for determining materiality and applied 70% as performance materiality. We have judged expenditure to be the most relevant measure for the users of the annual report and financial statements.
- The approach is consistent with previous years. However, the percentages applied have been revisited to take into account our knowledge of the Commission and our understanding of the control environment, including the increased fraud risks as a result of the pandemic.

Reporting to those charged with governance

- We will report to you all misstatements found in excess of £1.7k (2019/20: £860).
- We will report to you misstatements below this threshold if we consider them to be material by nature.

- Our approach to determining the materiality benchmark is consistent with Audit Scotland guidance which states that the threshold for clearly trivial above which we should accumulate misstatements for reporting and correction to the Commission must not exceed £250k.

Our Annual Audit Report

We will:

- Report materiality;
- Provide comparative data and explain any changes in materiality compared to prior year;
- Explain any normalised or adjusted benchmarks we use; and
- Explain the concept of performance materiality and state what percentage of materiality we used, with our rationale.

Although materiality is the judgement of the Audit Director, the Commission must satisfy themselves that the level of materiality chosen is appropriate for the scope of the audit.

Scope of work and approach

Our key areas of responsibility under the Code of Audit Practice

Core audit work	Planned output	Timeline
1. Auditing the annual report and financial statements	Annual Audit Plan	31 March 2021
	Independent auditor's report	1 September 2021
2. Audit dimensions	Annual Audit Plan	31 March 2021
	Annual Audit Report	1 September 2021
3. Other wider scope audit work	Fraud Returns	Quarterly (30 November 2020, 28 February 2021, 31 May 2021 and 31 August 2021)

Significant risks

Operating within the expenditure resource limits				12
Management override of controls				13

Level of management judgement

High degree of management judgement

Some degree of management judgement

Limited management judgement

Controls approach adopted

Assess design & implementation

Significant risks (continued)

Operating within the expenditure resource limits

Risk identified and key judgements

Under Auditing Standards there is a rebuttable presumption that the fraud risk from revenue recognition is a significant risk. In line with previous years, we do not consider this to be a significant risk for the Commission as there is little incentive to manipulate revenue recognition with the majority of revenue being from the Scottish Parliamentary Corporate Body (SPCB) which can be agreed to confirmations letters supplied.

We therefore consider the fraud risk to be focused on how management operate within the expenditure resource limits set by the SPCB. There is a risk is that the Commission could materially misstate expenditure in relation to year end transactions, in an attempt to align with its tolerance target or achieve a breakeven position.

The significant risk is therefore pinpointed to the completeness of accruals and the existence of prepayments made by management at the year end and invoices processed around the year end as this is the area where there is scope to manipulate the final results. Given the financial pressures across the whole of the public sector, there is an inherent fraud risk associated with the recording of accruals and prepayments around year end.

Deloitte response and challenge

We will evaluate the results of our audit testing in the context of the achievement of the limits set by the SPCB. Our work in this area will include the following:

- Evaluating the design and implementation of controls around monthly monitoring of financial performance;
- Obtain independent confirmation of the resource limits allocated to the Commission by the SPCB;
- Perform focused testing of accruals and prepayments made at the year end; and
- Perform focused cut-off testing of invoices received and paid around the year end.

Significant risks (continued)

Management override of controls

Risk identified

Management is in a unique position to perpetrate fraud because of their ability to manipulate accounting records and prepare fraudulent financial statements by overriding controls that otherwise appear to be operating effectively.

Although management is responsible for safeguarding the assets of the entity, we planned our audit so that we had a reasonable expectation of detecting material misstatements to the financial statements and accounting records.

Deloitte response and challenge

In considering the risk of management override, we plan to perform the following audit procedures that directly address this risk:

Test the appropriateness of journal entries recorded in the general ledger and other adjustments made in the preparation of the annual report and financial statements. In designing and performing audit procedures for such tests, we plan to:

- Test the design and implementation of controls over journal entry processing;
- Make inquiries of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments;
- Select journal entries and other adjustments made at the end of a reporting period; and
- Consider the need to test journal entries and other adjustments throughout the period.

Review accounting estimates for biases and evaluate whether the circumstances producing the bias, if any, represent a risk of material misstatement due to fraud.

In performing this review, we plan to:

- Evaluate whether the judgments and decisions made by management in making the accounting estimates included in the annual report and financial statements, even if they are individually reasonable, indicate a possible bias on the part of the entity's management that may represent a risk of material misstatement due to fraud. If so, we will re-evaluate the accounting estimates taken as a whole; and
- Perform a retrospective review of management judgements and assumptions related to significant accounting estimates reflected in the annual report and financial statements of the prior year.

For significant transactions that are outside the normal course of business for the entity, or that otherwise appear to be unusual given our understanding of the entity and its environment and other information obtained during the audit, we shall evaluate whether the business rationale (or the lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets.

Coronavirus (COVID-19) outbreak

Impact on our audit

The COVID-19 pandemic had a significant impact on the 2019/20 audit process, despite impacting relatively late in the year. We would expect there to be guidance as we approach year-end on accounting and disclosure requirements for 2020/21, where the impact has been much more extensive on all organisations.

Requirements

A key element of this will be communicating risks and governance impacts in narrative reporting, consistent with the Financial Reporting Council's guidance to organisations on the importance of communicating the impact of COVID-19 and related uncertainties, including their impact on resilience and going concern assessments.

Entity-specific explanations of the current and expected effects of COVID-19 and the Commission's plans to mitigate those effects should be included in the narrative reporting (including where relevant the annual governance statement), including in the discussion on Risks and Uncertainties impacting an organisation.

Actions

While there may be greater clarity as we approach year-end, we would expect organisations as part of their reporting to conduct a thorough assessment of the current and potential future effects of the COVID-19 pandemic including:

- Consideration of the impact across the Commission's operations, including on its income streams, supply chains and cost base, and the consequent impacts on financial position;
 - The scenarios assumed in making forecasts and on the sensitivities arising should other potential scenarios materialise (including different funding scenarios); and
 - The effect of events after the reporting date, including the nature of non-adjusting events and an estimate of their financial effect, where possible.
-

<p>We will consider the key impacts on the Commission such as:</p> <ul style="list-style-type: none">• Interruptions to service provision• Supply chain disruptions• Unavailability of personnel• Changes in income	<p>We have considered the impact of the outbreak on the annual report and financial statements, discussed further on the next slide including:</p> <ul style="list-style-type: none">• Narrative reporting, including disclosures on financial sustainability• Principal risk disclosures• Events after the reporting period and relevant disclosures	<p>We will continue to assess the impact on the audit including:</p> <ul style="list-style-type: none">• Resource planning• Timetable of the audit• Impact on our risk assessment• Logistics including meetings with entity personnel

Coronavirus (COVID-19) outbreak (continued)

Impact on our audit (continued)

Impact on annual report and financial statements

Narrative and other reporting issues

The following areas will need to be considered by the Commission:

- Narrative reporting as well as the usual reporting requirements will need to cover the effects of the pandemic on services, operations, performance, strategic direction, resources and financial sustainability.
- Reporting judgements and estimation uncertainty, the Commission will need to report the impact on material transactions including decisions made on the measurements of assets and liabilities.

Going concern assessment

The annual report and financial statements should include disclosure on the basis of the Commission's going concern assessment, including related uncertainties.

The Commission also needs to report on the impact of financial pressures and its financial sustainability in the narrative report, as well as any relevant liquidity reporting requirements under IFRS 7 Financial Instruments: Disclosures.

Events after the reporting period and relevant disclosures

Events are likely to continue to move swiftly, and the Commission will need to consider the events after the reporting period and whether these events will be adjusting or non-adjusting and make decisions on a transaction by transaction basis.

Reporting hot topics

Increased focus on quality reporting

Deloitte view

The expectations of corporate reporting, reflected in the Financial Reporting Council's ('the FRC') monitoring and enforcement priorities, are increasing. While the focus is primarily on corporate entities, we highlight these areas where improved disclosures would help meet stakeholder expectations.

The potential impacts of Brexit

Depending upon events, organisations may be preparing annual report and financial statements against the backdrop of continued uncertainty around the UK's future relationship with the EU. Even with a deal agreed, the future basis of UK-EU trade will affect the longer-term viability period of 3-5 years and a longer consideration of prospects.

ACTION: Depending upon events through to the date of signing, we would expect to see annual report and financial statements reflecting at least:

- Relevant risks and uncertainties, and actions taken to manage those risks; and
- Consideration of whether there is any impact on critical accounting judgements and areas of estimation uncertainty.

We will discuss with the Commissioner closer to the time areas where disclosures may be appropriate.

Climate-related risks

The report by the Intergovernmental Panel on Climate Change ('IPCC') has made it clear that prompt and decisive action on climate change is required from governments, businesses and individuals alike.

The recommendations of the Taskforce on Climate-related Financial Disclosure ('TCFD') are gaining momentum. The government has proposed mandatory TCFD disclosures by 2022, and the FRC is undertaking a major review of how organisations assess and report the impact of climate change. The FRC expects organisations to disclose how they have taken climate change into account in assessing the resilience of the business model, its risks, uncertainties and viability both in immediate and longer term.

Investors are challenging companies that are not factoring the effects of the Paris Climate Agreement into their critical accounting judgements and are not disclosing comprehensively these judgements, assumptions, sensitivities and uncertainties.

- ACTION:** Clearly articulate how your organisation is addressing climate change e.g.
- Whether this is a principal risk and how it is being managed; and
 - Its impact on the business model, the viability statement and the key assumptions and projections in impairment reviews and valuations (including in assessing remaining asset lives).

Revisions to auditing standards coming into effect

ISA (UK) 570 – Going concern

The FRC issued a revised going concern standard in September 2019, that takes effect for periods commencing on or after 15 December 2019. For public sector bodies, this will be March 2021 year ends and later.

The revision was made in response to recent enforcement cases and well-publicised corporate failures where the auditor's report failed to highlight concerns about the prospects of entities which collapsed shortly after.

We have summarised below the key areas of change in the standard – however, the Public Audit Forum is also consulting on changes to Practice Note 10, with the intention of reflecting public sector considerations in the approach to going concern, and so the ultimate impact of ISA (UK) 570 changes will be affected by this.

The key changes affect:

- Risk assessment procedures and related activities, increasing consideration of the entity's business model, operations and financing;
- The auditor's evaluation of management's assessment of the going concern assumption (which therefore requires a clearly documented assessment to be prepared by management);
- Enhanced professional scepticism requirements, including around the evaluation of the sufficiency and appropriateness of audit evidence;
- Considering the appropriateness of disclosures; and
- Reporting in enhanced audit reports.

"The revised standard means UK auditors will follow significantly stronger requirements than those required by current international standards."

FRC's press release, 30 September 2019

Revisions to auditing standards coming into effect (continued)

ISA (UK) 540 – Auditing Accounting Estimates and Related Disclosures

Since 2015, the International Auditing and Assurance Standards Board (IAASB) has sought to identify audit issues relating to accounting estimates for financial institutions and other entities. Initially, this focused on the impact of IFRS 9 *Financial Instruments*, because it would fundamentally change the way that banks and other entities account for loan assets and other credit exposures.

However, the IAASB concluded that most, if not all, issues identified for expected credit losses would be equally relevant when auditing other complex accounting estimates. Accordingly, a holistic revision of ISA 540 was undertaken and the new standard takes effect for periods commencing on or after 1 January 2020. For public sector bodies, this will be March 2021 year ends and later.

We summarise on the next few slides how this will impact our audit.

“There is a clear need to update ISA 540 to support better quality audits of increasingly complex accounting estimates”

FRC letter to the IAASB, July 2017

Area of change

Impact on our audit

Impact on the Commission

Assessment of oversight and governance relating to estimates

In connection with our planning work to understand the entity and its environment, including internal control, we will specifically enquire regarding management’s processes, and the oversight and governance of those processes relating to accounting estimates.

You will need to consider the adequacy of your processes and controls over estimates, and documentation thereof.

Revisions to auditing standards coming into effect (continued)

ISA (UK) 540 – Auditing Accounting Estimates and Related Disclosures (continued)

Area of change	Impact on our audit	Impact on the Commission
Identification of inherent risk factors; separate assessment of inherent risk and control risk	Recognising a spectrum of inherent risk, we will assess risks of material misstatement in estimates with reference not only to estimation uncertainty, but also complexity, subjectivity or other inherent risk factors, and the interrelationship among them.	You will need to provide clear documented rationale for (a) the selection and application of the method, assumptions and data in making the accounting estimate, including any changes in the current year, and controls relating to those aspects; and/or (b) the selection of a point estimate and related disclosures for inclusion in the annual report and financial statements.
Objectives-based work effort requirements	We will specifically assess control risk relating to estimates, which may require us to evaluate the design and determine implementation of an increased number of internal controls. Our subsequent audit procedures will be responsive to this assessment, and designed to obtain evidence around the methods, significant assumptions, data and (where applicable) the selection of a point estimate and related disclosures about estimation uncertainty.	You should expect more challenge of the evidence provided in support of accounting estimates, use of external data sources and your consideration of contradictory evidence.
Enhanced “stand back” requirement, to evaluate the audit evidence obtained	We will specifically design our procedures, to enhance our application of professional scepticism, so that they are not biased towards finding corroborative evidence; our overall evaluation of the evidence obtained will weigh both corroborative and contradictory evidence.	You should expect more challenge of the evidence provided in support of accounting estimates, use of external data sources and your consideration of contradictory evidence.

Revisions to auditing standards coming into effect (continued)

ISA (UK) 540 – Auditing Accounting Estimates and Related Disclosures (continued)

Area of change	Impact on our audit	Impact on the Commission
Enhanced requirements about whether disclosures are “reasonable”	The extant ISA 540 required us to evaluate whether disclosures were “adequate”. The change to “reasonable” will involve greater consideration of the overall meaning conveyed through disclosures. For example, where estimation uncertainty associated with an estimate is multiple times materiality, we will consider whether the disclosures appropriately convey the high degree of estimation uncertainty and the range of possible outcomes.	You should expect more challenge on disclosures relating to estimates, particularly for where you have selected a point estimate from a range and those with high estimation uncertainty.
New requirements when communicating with those charged with governance	In accordance with ISA (UK) 260 and ISA (UK) 265, our communications from the audit have included significant qualitative aspects of your accounting practices and significant deficiencies in internal control. With the revised ISA (UK) 540, these communications will specifically include matters regarding accounting estimates and take into account whether the reasons for our risk assessment relate to estimation uncertainty, or the effects of complexity, subjectivity or other inherent risk factors.	You should expect increased reporting in relation to accounting estimates which may be mirrored in our Annual Audit Report.

Areas where we consider the impact to be greatest:

Key areas impacted will include accruals although in previous years these have been non-complex accruals and therefore the new standard is expected to have limited impact.

Audit Quality

Our commitment to audit quality

Our objective is to deliver a distinctive, quality audit to you. Every member of the engagement team will contribute, to achieve the highest standard of professional excellence.

In particular, for your audit, we consider that the following steps will contribute to the overall quality:

We will apply professional scepticism on material issues and significant judgements by using our expertise in the central government sector and elsewhere to provide robust challenge to management.

We have obtained a deep understanding of your business, its environment and of your processes in income and expenditure recognition, payroll expenditure and capital expenditure enabling us to develop a risk-focused approach tailored to the Commission.

Our engagement team is selected to ensure that we have the right subject matter expertise and industry knowledge.

In order to deliver a quality audit to you, each member of the core audit team has received tailored learning to develop their expertise in audit skills, delivered by Pat Kenny (Audit Director) and other sector experts. This includes sector specific matters and audit methodology updates.

Engagement Quality Control Review

We have developed a tailored Engagement Quality Control approach. Our dedicated Professional Standards Review ('PSR') function will provide a 'hot' review before any audit or other opinion is signed. PSR is operationally independent of the audit team, and supports our high standards of professional scepticism and audit quality by providing a rigorous independent challenge.

Wider scope requirements

Overview

The Code of Audit Practice sets out four audit dimensions that frame the wider scope of the audit of the annual report and financial statements. These are financial sustainability, financial management, governance and transparency and value for money. The audit dimensions provide a common framework for all the audit work conducted for the Auditor General and for the Accounts Commission.

Due to the relative size and scale of the functions delivered by the Commission, we have concluded that the full wider scope audit is not appropriate. The Commission has a budget of £1m, mainly comprising payroll costs. Transactions are generally routine in nature and the majority of funding is from the SPCB. We have updated our risk assessment which included consideration of the Commission's risk registers and have concluded that the "small body" exemption is still appropriate. In accordance with the Code, our work in this area will therefore be restricted to concluding on the following:

Audit dimension	Significant risk identified	Planned audit response
Governance statement	There is a risk that the disclosures in the governance statement do not meet the requirements of the Scottish Public Finance Manual (SPFM) or are inconsistent with our knowledge of the Commission.	We will review the draft governance statement and assess whether there are any inconsistencies or omissions based on other audit evidence obtained throughout the audit.
Financial sustainability	<p>The financial impact of the pandemic includes increased IT expenditure to enable staff to work remotely. Additional work has been carried out in relation to the human rights impacts of the pandemic and government policy decisions.</p> <p>There is a risk that robust long-term planning arrangements are not in place to ensure that the body can manage its finances sustainably and deliver services effectively, identify issues and challenges early and act on them promptly.</p>	We will review the financial monitoring in place throughout the financial year, the planning arrangements in place for future years and the Commission's response to the risks arising from the pandemic.

Purpose of our report and responsibility statement

Our report is designed to help you meet your governance duties

What we report

Our report is designed to establish our respective responsibilities in relation to the annual report and financial statements audit, to agree our audit plan and to take the opportunity to ask you questions at the planning stage of our audit. Our report includes:

- Our audit plan, including key audit judgements and the planned scope; and
- Key regulatory and corporate governance updates, relevant to you.

Use of this report

This report has been prepared for the Commission, as a body, and we therefore accept responsibility to you alone for its contents. We accept no duty, responsibility or liability to any other parties, since this report has not been prepared, and is not intended, for any other purpose. Except where required by law or regulation, it should not be made available to any other parties without our prior written consent.

We welcome the opportunity to discuss our report with you and receive your feedback.

What we don't report

As you will be aware, our audit is not designed to identify all matters that may be relevant to the Commission.

Also, there will be further information you need to discharge your governance responsibilities, such as matters reported on by management or by other specialist advisers.

Finally, the views on internal controls and business risk assessment in our final report should not be taken as comprehensive or as an opinion on effectiveness since they will be based solely on the audit procedures performed in the audit of the annual report and financial statements and the other procedures performed in fulfilling our audit plan.

Other relevant communications

We will update you if there are any significant changes to the audit plan.

Pat Kenny
for and on behalf of Deloitte LLP

Changes to the Government Financial Reporting Manual (FReM)

2020/21 Edition

Background

HM Treasury has issued a revised version of the FReM for the financial year 2020/21. The FReM is the technical accounting guide to the preparation of financial statement and complements guidance on the handling of public funds published by the Scottish Government.

The 2020-21 edition has a revised structure and is now separated into four sections:

- Part A: Principles, purpose and best practice.
- Part B: The form and content of government annual report and financial statements.
- Part C: Application of accounting standards to government annual report and financial statements.
- Part D: Further guidance for government annual report and financial statements.

Other changes include:

- A new chapter addressing best practice in narrative reporting.
- Clearer guidance on the performance report, including specific mandatory requirements.
- Introduction of 'comply or explain' requirements in certain areas including the structure of the organisation, risks faced, unit cost data and relevant trend data.

A full amendments log has been published which explains the changes from 2019/20 and the reason for the change https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/853244/2020-21_Amendment_Record.pdf

In response to the continuing impact of COVID-19, HM Treasury has issued an addendum setting out minimum requirements for 2020/21. The addendum permits, but does not require, bodies to omit the performance analysis section of the Performance Report. Where relevant performance information has already been published elsewhere, bodies are encouraged to refer to the relevant publications. In addition, where unaudited information otherwise required to be included in the Accountability Report is already published elsewhere, bodies are permitted to refer to the relevant publication rather than including the information in their Accountability Report.

Next steps

We recommend that management review the changes to the FReM at the earlier opportunity, including the addendum. In particular the new chapter on narrative reporting best practice and the guidance on the performance report should be reviewed to understand the mandatory requirements and those which require to 'comply or explain'. This can then be compared with the published 2019/20 annual report and financial statements to identify any amendments required. We are happy to have early discussion on this to agree proposed amendments.

The State of the State 2020-21 (continued)

Government in the pandemic and beyond (continued)

The state according to the public

A survey of more than 5,000 members of the public shows how people feel about tax, spending and public service priorities amid the COVID-19 pandemic. We also explore attitudes towards data sharing with and across government, and unpick what the public across each nation and region wants to see levelled up.

58% of the public believe opportunities for young people will be worse as a result of coronavirus.

42% of the public believe that community spirit will have improved after the pandemic.

The state according to the people who run it

Over 40 senior public sector figures in England, Scotland, Wales and Northern Ireland talked with us about the issues that matter to them. We explore their views on the legacy of COVID-19, levelling up, EU Exit and creating a data-driven government.

Our interviews of **40** senior public sector figures found that many want to retain the agility of new ways of working however, many sense a gravitational pull back to normality.

Fast forward to the past

Is automation making organisations less diverse?

Background and overview

Robotics and intelligent automation are in the process of transforming the nature of work and the skills required to do it. Whilst there is a clear risk of reinforcing structural inequalities there is also an opportunity to address diversity issues within automation programmes to ensure public sector organisations can capitalise on the benefits that both automation and diversity bring to business outcomes.

For many public sector organisations implementing automation whilst considering diversity is new and uncharted territory. We would like to encourage our public sector clients to consider and discuss this crucial issue.

Based on exclusive client interviews, insight from public sector projects and extensive desk research, our report explores the potential risks of not considering the implications of automation on workforce diversity and inequality. It also identifies the barriers to embedding diversity in automation programmes.

The report provides a practical four stage framework to integrate diverse groups to not only survive but thrive in a new automated and digital world.

Next steps

The full report is available at <https://www2.deloitte.com/content/dam/Deloitte/uk/Documents/public-sector/deloitte-uk-diversity-and-automation-brochure-landscape.pdf>

Appendices

Our other responsibilities explained

Fraud responsibilities

Your Responsibilities:

The primary responsibility for the prevention and detection of fraud rests with management and those charged with governance, including establishing and maintaining internal controls over the reliability of financial reporting, effectiveness and efficiency of operations and compliance with applicable laws and regulations.

Our Responsibilities:

- We are required to obtain representations from your management regarding internal controls, assessment of risk and any known or suspected fraud or misstatement.
- As auditors, we obtain reasonable, but not absolute, assurance that the annual report and financial statements as a whole are free from material misstatement, whether caused by fraud or error.
- As set out in the significant risks section of this document, we have identified risks of material misstatement due to fraud in relation to operating within the expenditure resource limit, and management override of controls.
- We will explain in our audit report how we considered the audit capable of detecting irregularities, including fraud. In doing so, we will describe the procedures we performed in understanding the legal and regulatory framework and assessing compliance with relevant laws and regulations.

Whilst this requirement has been in place for a few years for public interest entities (as defined by the EU Audit Regulation), recent changes to ISAs (UK) mean it will apply to **all** entities for periods **commencing on or after 15 December 2019**.

Fraud Characteristics:

- Misstatements in the annual report and financial statements can arise from either fraud or error. The distinguishing factor between fraud and error is whether the underlying action that results in the misstatement of the annual report and financial statements is intentional or unintentional.
- Two types of intentional misstatements are relevant to us as auditors – misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets.

Our other responsibilities explained (continued)

Fraud responsibilities (continued)

We will make the following inquiries regarding fraud and non-compliance with laws and regulations:

Management:

- Management's assessment of the risk that the annual report and financial statements may be materially misstated due to fraud, including the nature, extent and frequency of such assessments.
- Management's process for identifying and responding to risks of fraud.
- Management's communication, if any, to those charged with governance regarding its processes for identifying and responding to the risks of fraud.
- Management's communication, if any, to employees regarding its views on business practices and ethical behaviour.
- Whether management has knowledge of any actual, suspected or alleged fraud affecting the entity.
- We plan to involve management from outside the finance function in our inquiries.

Those charged with governance:

- How those charged with governance exercise oversight of management's processes for identifying and responding to the risks of fraud in the entity and the internal control that management has established to mitigate these risks.
- Whether those charged with governance have knowledge of any actual, suspected or alleged fraud affecting the entity.
- The views of those charged with governance on the most significant fraud risk factors affecting the entity.

Independence and fees

As part of our obligations under International Standards on Auditing (UK), we are required to report to you on the matters listed below:

Independence confirmation

We confirm the audit engagement team, and others in the firm as appropriate, Deloitte LLP and, where applicable, all Deloitte network firms are independent of the Commission and will reconfirm our independence and objectivity to the Commission's Office for the year ending 31 March 2021 in our final report to the AAB.

Fees

The audit fee for 2020/21, in line with the fee range provided by Audit Scotland is £14,230, as analysed below:

	£
Auditor remuneration	11,100
Audit Scotland fixed charges:	
Pooled costs	2,560
Audit support costs	570
Contribution to PABV	-
Total proposed fee	14,230

There are no non-audit services fees proposed for the period.

Non-audit services

In our opinion there are no inconsistencies between the FRC's Ethical Standard and the company's policy for the supply of non-audit services or any apparent breach of that policy. We continue to review our independence and ensure that appropriate safeguards are in place including, but not limited to, the rotation of senior partners and professional staff and the involvement of additional partners and professional staff to carry out reviews of the work performed and to otherwise advise as necessary.

Relationships

We have no other relationships with the Commission, its directors, senior managers and affiliates, and have not supplied any services to other known connected parties.

Our approach to quality

AQR team report and findings

Audit quality remains our number one priority and we have a relentless commitment to it. We continue to invest in and enhance our Audit Quality Monitoring and Measuring programme.

In July 2020 the Financial Reporting Council (“FRC”) issued individual reports on each of the seven largest firms, including Deloitte, on Audit Quality Inspections providing a summary of the findings of its Audit Quality Review (“AQR”) team for the 2019/20 cycle of reviews.

We greatly value the FRC reviews of our audit engagements and firm wide quality control systems, a key aspect of evaluating our audit quality.

We are pleased with our results for the inspections of FTSE 350 entities achieving 90% assessed as good or needing limited improvement, which included some of our highest risk audits. Our objective is for 100% of our audits to be assessed as good or needing limited improvement and we know we still have work to do in order to meet this standard. We are however, extremely disappointed one engagement received a rating of significant improvements required during the period. This is

viewed very seriously within Deloitte and we have worked with the AQR to agree a comprehensive set of swift and significant firm wide actions.

We are also pleased to see the impact of our previous actions on prior year adjustments is reflected in the results of current year inspections with no findings in this areas. In addition the FRC identified good practice examples including in: risk assessment, group oversight, our comprehensive IFRS 9 expected credit loss audit programme and our audit committee reporting.

Embedding a culture of challenge in our audit practice underpins the key pillars of our audit strategy. We invest continually in our firm wide processes and controls, which we seek to develop globally, to underpin consistency in delivering high quality audits whilst ensuring engagement teams exercise professional scepticism through robust challenge.

All the AQR public reports are available on its website.

Our approach to quality (continued)

AQR team report and findings (continued)

The AQR's 2019/20 Audit Quality Inspection Report on Deloitte LLP

"We reviewed 17 individual audits this year and assessed 13 (76%) as requiring no more than limited improvements. Of the ten FTSE 350 audits we reviewed this year, we assessed nine (90%) as achieving this standard."

"We have highlighted in this report aspects of firm-wide procedures which should be improved, including strengthening the monitoring of the firm's audit quality initiatives."

"Our key findings related principally to the need to:

- Improve the extent of challenge over cash flow forecasts in relation to the impairment of goodwill and other assets.
- Enhance the effectiveness of substantive analytical review and other testing for revenue.
- Improve the assessment and extent of challenge regarding management's estimates, particularly for model testing."

"The firm has taken steps to address the key findings in our 2019 public reports, with actions that included focused training and standardising the firm's audit work programs.

We have identified improvements, for example in the audit of potential prior year adjustments and related disclosures, a key finding last year. We also identified good practice in a number of areas of the audits we reviewed (including effective group oversight and robust risk assessment) and in the firm-wide procedures (including the firm's milestone program, with expected dates for the phasing of the audit monitored by the firm)."
